**GENDER EQUALITY PLAN**  
**IRON AND STEEL INSTITUTE OF Z.I. NEKRASOV**  
**NATIONAL ACADEMY OF SCIENCE OF UKRAINE**

Dnipro  
2026

## **1. General provisions**

1.1. The Gender Equality Plan (hereinafter referred to as the GEP) defines the goals, principles, priorities and mechanisms for the formation and implementation of the gender equality policy at Iron and Steel Institute of Z. I. Nekrasov of NAS of Ukraine (hereinafter referred to as ISI NASU).

1.2. The Gender Equality Plan has been developed in accordance with

- The Constitution of Ukraine;
- The Law of Ukraine “On Ensuring Equal Rights and Opportunities for Women and Men”;
- The Law of Ukraine “On Scientific and Scientific-Technical Activities”;
- The UN Sustainable Development Goals (in particular SDG 5 “Gender Equality”);
- The European Commission’s recommendations on the Gender Equality Plan for scientific institutions.

1.3. The GEP applies to all employees of the institution, regardless of gender, age, position, form of employment or type of employment relationship.

## **2. Goals and objectives of the GEP**

### **2.1. Goal**

The goal of GEP is to create an inclusive and non-discriminatory environment at ISI NASU, where all members of the team, regardless of gender, have equal rights and opportunities for development, career growth and realization of their potential in scientific, scientific-organizational and managerial activities.

### **2.2. Main objectives:**

- creating a safe working environment free from gender-based violence and harassment;
- ensuring equal access to scientific positions, resources and career growth;
- eliminating manifestations of direct and indirect gender discrimination;
- integrating a gender approach into scientific research and managerial decisions;
- supporting a balance between the professional and personal lives of employees.

## **3. Principles of GEP Implementation**

The implementation of GEP is based on the principles of:

- equality of rights and opportunities;
- non-discrimination on any grounds;
- transparency and objectivity of personnel and competitive procedures;
- academic integrity;
- institutional responsibility;
- regular monitoring and adjustment of measures in accordance with the results obtained and changes.

#### **4. Main directions of GEP implementation**

##### **4.1. Ensuring gender equality in scientific activities:**

- ensuring equal access to laboratory facilities, research funding, scientific mobility, etc.;
- integrating a gender approach into the subject of scientific research (where relevant);
- celebrating the achievements of all specialists without gender discrimination;
- supporting young scientists regardless of gender.

##### **4.2. Ensuring balance in personnel policy and management:**

- applying transparent criteria when recruiting and promoting staff, setting and increasing salaries;
- ensuring equal conditions for the participation of women and men in competitions for scientific and managerial positions;
- encouraging the representation of different genders in management, advisory and expert bodies;
- preventing gender bias during certification and evaluation of performance results;
- ensuring decent representation of women in the governing and expert bodies, commissions and committees of ISI NASU.

##### **4.3. Ensuring a balance between professional activities and personal life:**

- creating decent conditions for combining scientific work with family responsibilities;
- preventing discrimination in connection with parental leave;
- flexible organizational approaches to working hours (within the framework of current legislation).

##### **4.4. Preventing discrimination, harassment and violence:**

- developing a zero-tolerance policy for any forms of gender-based violence;
- informing employees about the mechanisms for submitting complaints and their consideration;
- ensuring confidentiality and impartiality of response procedures.

##### **4.5. Raising awareness and a culture of gender equality:**

- disseminating the principles of equal opportunities in internal communications;
- conducting information events, seminars and trainings;
- disseminating best practices of gender equality in the scientific community.

#### **5. GEP implementation mechanisms**

To implement the GEP, create a Commission to consider gender issues, which should include representatives of management, labor, the council of young scientists, and the trade union committee of ISI NASU.

#### **6. Expected results**

The implementation of the GEP will contribute to:

- the formation of an inclusive and safe scientific environment;

- increasing the efficiency of personnel and scientific policies;
- eliminating gender imbalances in governing bodies and remuneration;
- compliance of the institution's activities with European standards and requirements of international programs;
- strengthening the institution's reputation as a modern and socially responsible scientific organization.

## **7. Final provisions**

7.1. The GEP is an official document of ISI NASU, approved by order of the Director and posted in the public domain on the official website. The GEP shall enter into force from the moment of its approval.

7.2. The provisions of the GEP shall be mandatory for all structural divisions and employees of ISI NASU.

7.2. The general control over the implementation of the GEP shall be exercised by the Director of ISI NASU, and the coordination and monitoring of the implementation of its provisions shall be exercised by the Deputy Director for Scientific Work of ISI NASU. Regular collection and analysis of gender-oriented data on the staff composition, positions held and career advancement, participation in scientific projects and governing bodies shall be carried out by the Head of Personnel. Each head of the department shall be responsible for compliance with the principles and provisions of the GEP in his/her department.

7.2. The provisions of the GEP shall be subject to periodic review and updating taking into account changes in legislation, international recommendations and the results of internal monitoring of the results of its implementation.
